

HOW LONG WILL MY TEETH STAY WHITE?

Your lifestyle is the greatest influence on your oral health. If you're an avid drinker of coffee, wine or soft drinks, your teeth whitening will diminish sooner than someone who prefers water. Typically, your whitening will be at its best for the first 6 months, before slowly diminishing.

IS POLA WHITENING SAFE?

Yes. Clinical studies have shown that teeth whitening with carbamide peroxide or hydrogen peroxide is safe if performed under the guidance and supervision of a trained dentist. With a history of improving teeth for 50 years, our Pola whitening scientists have refined an industry leading tooth whitening formula that removes tough 'rusted on' stains, while remaining completely safe for your teeth.

WHAT IS THE DIFFERENCE BETWEEN POLA AND DIY KITS THAT CAN BE PURCHASED ONLINE?

There are numerous brands and methods of teeth whitening available to purchase online or over the counter, however, they are not always reliable and safe. It is always important to consult your dentist if you are looking to whiten your teeth, as they will be able to assess the health of your teeth and decide whether it is safe to whiten them. Clinical studies have shown that bleaching with carbamide or hydrogen peroxide if done correctly under the application or instruction of a dentist, is safe for teeth and gums.

ASK YOUR DENTIST OR HYGIENIST WHICH POLA PRODUCT IS RIGHT FOR YOU!

2 x 10 or 2 x 15 minute treatments a day.

WHITER
TEETH IN
FIVE DAYS

5 day treatment time.

No chair time or custom trays required, saving time for both patient and dentist.

EASY TO USE

Portable, rechargeable and easy to wear with no cord attached to mouthpiece.

Pola LED mouthpiece is a dual arch and a universal size.

PROFESSIONALLY
USED AND
RECOMMENDED

Pola is a professional tooth whitening system that is trusted and recommended by dentists to achieve a safer, quicker and whiter smile.

The high viscosity, neutral pH tooth whitening gels ensure the greatest patient comfort in a take home kit.

The unique blend of soothers, conditioners and high water content assist in reducing sensitivity.

KEY THINGS TO KNOW

WHAT CAUSES TOOTH DISCOLORATION?

Everyone's teeth are unique, therefore they discolor and stain in different ways. The discoloration or staining of a person's tooth is typically caused by coffee, black tea, herbal tea, red wine, spicy foods such as curry and smoking cigarettes.

HOW MUCH WHITER WILL MY TEETH BE?

Many teeth whitening manufacturers make claims of '5 shades' whiter or similar. However, this can be misleading as it depends on the original shade of your teeth and the current staining on your teeth. Pola is formulated to remove the toughest stains from your teeth and return your teeth to their whitest natural color.
