DR. AGATHA BIS

CONSIDER USING GLASS IONOMERS IN YOUR CLINIC:

I wrote about three challenges of using composite resin. Those include Secondary Decay, Technique Sensitivity, and Leakage Probability. There are many circumstances where the use of an alternative material that reduces and prevents those types of challenges would be indicated. Glass Ionomer (GI) is one of these restorative materials, and most of us have used glass ionomer at one time or another in clinical practice.
